Lab 6 — Cut, Caption and Assess the Scene

Copy-and-adapt prompts. Click **Copy**, paste into Higgsfield, replace anything in <angle brackets>.

PROMPT 1 — DIRECT ONE CHANGE

```
Keep everything in this take the same. Change one thing only: in shot 3 make the camera push in slowly on the biker's face as he recognises his friend, and add a beat of silence before the dialogue.
```

PROMPT 2 — ASSEMBLE, CAPTION AND SCORE (SUPERCOMPUTER)

```
Assemble these two clips into one 20-second cut: take 2 first, then shots 4–5 of take 1. Trim dead frames at each cut.
Add a moody low-tempo soundtrack under the bar ambience, keep the dialogue clearly above the music.
Burn captions for the dialogue: white, bottom third, two lines max. Export 16:9 and 9:16.
Then score the cut against: resolution, motion, face/prop continuity, audio, captions, pacing, platform compliance. Table, pass/fail.
```

Draft first: generate on Seedance 2.5 Draft (480p, about 45 credits for 15 s) and finalise only the take you keep (about 240 credits at 1080p).
