Lab 4 — Build Your Elements: Characters, Locations and Props

Copy-and-adapt prompts. Click **Copy**, paste into Higgsfield, replace anything in <angle brackets>.

PROMPT 1 — CAST A CHARACTER (SUPERCOMPUTER)

```
Main character in a biker road movie, 25 years old, modern style clothing.
Use the character-sheet skill. Show me five photoreal casting options first; I will pick
one before you build the reference sheet.
```

PROMPT 2 — EDIT ONE DETAIL, KEEP IT CONSISTENT

```
Give him a silver wallet chain hanging off his jeans pocket. Replace the black t-shirt
with a plain white ribbed cotton tank top, same tank top in all views.
```

PROMPT 3 — LOCATION WITH SPATIAL ANCHORS

```
Wide interior of a dim neighbourhood bar at night: long wooden counter on the right with
eight black stools, beer taps and backlit bottles, a pool table at the back, warm
practical lamps, one large window on the left wall. Photoreal, 16:9, no people.
```

PROMPT 4 — PROP (RUN ON TWO MODELS)

```
A slim orange hard-shell briefcase with a ribbed moulded lid, rounded corners, a black
top handle and two metal latches, white background, soft studio light, no logos or text.
```

> Draft first: generate on Seedance 2.5 Draft (480p, about 45 credits for 15 s) and finalise only the take you keep (about 240 credits at 1080p).
