Lab 2 — Write the Script and Shot List with Supercomputer and AI Director

Copy-and-adapt prompts. Click **Copy**, paste into Higgsfield, replace anything in <angle brackets>.

PROMPT 1 — BRIEF AI DIRECTOR — WHO / WHERE / WHAT HAPPENS

```
WHO: a bartender in her thirties, tired but proud of her bar.
WHERE: her empty neighbourhood bar after closing time.
WHAT HAPPENS: she switches the lights off one by one and walks to the window as the city lights come on.
Write a 15-second cinematic script, then a 6-shot storyboard with shot sizes and timings.
```

PROMPT 2 — THREE-PART PROMPT SKELETON

```
Scene context: <the visible action in one or two sentences>.
References: <@element — role, 100% as shown in the reference image>.
Shots (cut between each):
1. 0–3s: <shot size>, <action>, <camera>.
2. 3–6s: ...
Sound: <ambience>, <footsteps/clothing>, <dialogue or none>.
```

PROMPT 3 — SCRIPT CRITIQUE

```
Act as a film editor. Check this script for: weak opening shot, unclear hero, no obstacle, no visual payoff, and shots that cannot be filmed in 15 seconds. List each issue, then rewrite only the weakest shot.
```

> Draft first: generate on Seedance 2.5 Draft (480p, about 45 credits for 15 s) and finalise only the take you keep (about 240 credits at 1080p).
