Lab 8 — Add Voice, Music and Cinematic Effects

Topic 03 · Apply New AI Technologies to Improve Video Production · Maps to: K5 — technologies that improve efficiency and quality; A7 — evaluate new technologies

Finish the scene with the three upgrades that used to need three vendors: a generated soundtrack, a voiceover in a cloned or stock voice, and a cinematic effect. Time each one and rate it on quality, cost and control.

> **You'll build:** Your scene with a generated soundtrack, a voiceover line and one cinematic effect, plus a rated technology evaluation.
> **Tools:** Higgsfield: Audio (music + voice), Create Voice, lighting and colour presets, effect presets

Steps

1. Open Audio and generate a 20-second soundtrack from the music prompt. Generate two variations and keep the one that fits the cut's pace.
2. Voice: either pick a stock voice, or create your own voice from a clean 30-second recording of YOUR voice. Clone only a voice you have consent to use; sign assets/voice-consent-form.pdf for your own.
3. Generate the voiceover line and place it over the opening shot.
4. Apply one cinematic effect: re-run a shot with a different Lighting preset (Silhouette or Window) and Colour palette, or apply an effect preset from the effects gallery to one shot.
5. Record minutes and credits for each step in assets/tech-evaluation.csv and estimate what the same job takes with a studio, a composer and a voice artist.
6. Rate each technology 1–5 on quality, speed, cost, control and rights (A7), and decide whether it joins your pipeline.
7. Screenshot the Audio page, the effect before/after and your rated evaluation for your evidence.

Prompts

Open **prompts.html** in this folder for one-click copy (or prompts.pdf to print).

SOUNDTRACK

```
Moody late-night bar soundtrack, 20 seconds, slow 80 BPM, warm Rhodes piano, soft brushed drums, upright bass, building slightly on the last 5 seconds. Instrumental, no vocals.
```

VOICEOVER LINE

```
Calm, low male voice, unhurried, Singapore English: "Some nights you don't need a plan.
You just need to show up."
```

CINEMATIC EFFECT RE-RUN

```
Same shot, same Elements. Lighting: silhouette against the window, city lights behind.
Colour: Black gloss. Slow push-in. Keep timing and action identical.
```

Mock assets (assets/)

- music-prompt-cards.pdf — genre, tempo, instrument and mood cards
- voice-consent-form.pdf — consent to clone and use your own voice
- tech-evaluation.csv — technology, minutes, credits, quality, speed, cost, control, rights, verdict

Evidence to keep

Screenshot these. The Practical Performance asks you to paste screenshots like them under each task.

- Your generated soundtrack and voiceover in Higgsfield
- Effect before/after and your rated technology evaluation

Check your work

> The scene carries a generated soundtrack and a consented voiceover, one shot shows a clear cinematic effect, and every technology has a 1–5 rating with a keep/drop verdict.
